SELF-EVALUATION

Undergraduate background of Automation, with strong logical thinking skill. Postgraduate background of Engineering Management, learned systemed knowledge of product design and financial management.

I love code and have decided to start my career as a creative front end web developer. I am a skilled **CSS** user and still learning deeper in JS and other skills. Now I am going to graduate from HK, I want to go back China and eager for a job or internship opportunity. As a **fresh** to society, I **don't care** about the salary.

EDUCATION

HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY

Aug 2015, Master Degree of Engineering, Intelligent Building Technology and Management

[A multidisciplinary program with subjects of **construcion**, **electrical engineering** and **management**.]

XI'AN JIAOTONG UNIVERSITY

Sep 2011, Bachelor Degree of Engineering, Automation

[a program combining **electrical engineering**, **computer science**, **information technology**. With a wide branches of subjects including circuit, programming, data structure, embedded system design, etc.]

EXPERIENCE

E-Mail Navigation Menu / Poster Design, On-line Learning

By using static CSS stylesheet, design popular navigation bar. By using float skill and separating style and content, finishing designing static poster or calendars according to the design figure strictly. Sometimes utilizing flex display or bootstrap design idea. Tried to support different devices and browsers.

Simple Javascript Design, Baidu-lfe On-line Learning

Creating a dynamic lists with functions Such as delete node, add node, search node. Such as creating new objects, using function programming and simple data structure as tree, simple sorting algorithms. Designing a sorting system with functions of adding data and sorting data.

Data Reading and Writing Interface Design, Kindeci Internship, Xi'an

Using Visual Studio, C programming to create a interface for reading and writing data on OMRON port. The data means the speed or position of motor.

ACTIVITIES

Captain of Automation 7-people Football Team

As a member and leader, with other Automation teammates, battled for a semester and wonthe second place in our "Department Champion League" with other 10 teams.

Xi'an Jiaotong University Campus Star Competition

I participated in the xi'an jiaotong university campus star competition. I performed a guitar solo song. Although I didn't make it to the final round, the experience is still fresh and exciting.
